PROFESSIONAL SUMMARY

I am a motivated M.E. Computer Science student seeking an internship opportunity, with hands-on experience in Java, SQL, and JDBC, and a strong foundation in software development and problem-solving, eager to apply technical skills and gain practical industry experience while contributing effectively to team projects.

EDUCATION

- **M.E Computer Science and Engineering** 2025-2027
Sathyabama Institute Of Science And Technology
- **B.E Computer Science and Engineering (CGPA-8.33)** 2021-2025
S.A Engineering College, Thiruverkadu
- **HSC - Percentage(77.5)** 2021
Jaigopal Garodia Vivekananda Vidhyalaya , Avadi, Chennai
- **SSLC -Percentage(60.7)** 2019
Jaigopal Garodia Vivekananda Vidhyalaya , Avadi,Chennai

SKILLS

- **PROGRAMMING LANGUAGES** - Java, SQL
- **Databases** - MYSQL
- **Tools** - Git and GitHub
- **FrameWorks** - JDBC and Servlets

INTERNSHIP

NISC - Completed an internship at NISC in the domain of Mobile App Development, gaining hands-on experience in designing and developing mobile applications. (06/2025 - 09/2025)

Global Info Solutions - Completed an internship at Global Info Solutions in the domain of Machine Learning, where I learned and applied basic ML concepts in real-world projects.

PROJECTS

- **Student Management System in Java** - The Student Management System is a Java-based application that streamlines student data management, including enrollment, record updates, and report generation. It integrates database support, user authentication, and data validation for a secure and efficient system.
- **Smart Grievance Redressal System Using Java Microservices-** Built a microservices-based application using Java for managing user complaints and tracking issue resolution status. Improved scalability and communication between services through distributed architecture.
- **Invoice management using MySql and PHP** - Enables businesses to efficiently create, store, and track invoices in a structured database. PHP handles dynamic interactions, such as generating invoices, managing payments, and retrieving records, while MySQL ensures secure and organized data storage.

CERTIFICATIONS

- Java FullStack certification (Wipro)
- Kotlin Programming Language at Silicon Software services
